

CIRCULAR BUTTERFLY ISOLATION DAMPER

ADVANTAGES

- Space Saving, Gas Tight, Butterfly Type, Flanged

| | |
|----------------------------------|---|
| Application | nuclear, biotechnology, pharmaceutical, research & hospital facilities. |
| Frame | Stainless steel |
| Gasket | Silicone |
| Rec. final pressure drop | 6000 |
| Max Temperature (°C) | 70 |
| Max Temperature °C (Peak) | 70 |
| Relative Humidity max | 100% |
| Installation Options | Standard sizes from Ø100mm to Ø1000mm |
| Comment | Can be manufactured from painted steel or stainless steel |

A range of high integrity isolation dampers suitable for use in critical ventilation applications associated with nuclear, biotechnology, pharmaceutical, research & hospital facilities.
